For short-term prescriptions, such as antibiotics, use a participating retail pharmacy

As a member, you can go to any of nearly 60,000 retail pharmacies, including most major drugstores. Just ask your retail pharmacy if it's in our network. You can also log in to express-scripts.com and select "Locate a pharmacy" from the menu under "Manage Prescriptions."

Use generics and preferred medications. If you are taking a medication that's not on the preferred list, ask your doctor to consider prescribing a lower-cost generic or preferred brand-name drug. To find out which drugs are preferred, log in to express-scripts.com and select "Learn about Formularies" from the "Health & Benefits Information" menu.

Prior authorization: When is a coverage review necessary?

Some medications are not covered unless you first receive approval through a coverage review (prior authorization). This review uses plan rules based on FDA-approved prescribing and safety information, clinical guidelines and uses that

are considered reasonable, safe and effective.

There are other medications that may be covered, but with limits (for example, only for a certain amount or for certain uses), unless you receive approval through a coverage review. During this review, Express Scripts asks your doctor for more information than what is on the prescription before the medication may be covered under your plan. To find out whether a medication requires a coverage review, log in to [express-scripts.com](https://www.express-scripts.com) anytime, select "Price a medication" under "Manage Prescriptions", and search for your medication. On the pricing results page, select "View coverage notes" to see coverage details.
